ABSTRACT

This databook contains some of the basic information to be used in decision making and planning in the Mt. San Antonio College (MSAC) District. Part I focuses on the demographic characteristics of the district population, feeder school districts, and data from other educational providers. Part II presents statewide data on potential enrollment by age and minority composition, freshman admission eligibility comparisons, and ethnic group enrollment potential. Part III focuses specifically on MSAC students, looking at geographic distribution of MSAC credit enrollment, credit enrollment by zip code, sex, ethnicity, and age for spring, summer and fall 1985, and educational goal distributions. Instructional and supporting services and programs are examined in part IV, which includes a summary of instructional programs by division/department/support services, a comparison of retention between first census final count by department, grade distributions, MSAC adult education enrollment, and degrees/certificates/diplomas awarded. Part V includes data on MSAC staff, including personal characteristics, full-time certified staff in 5-year cohorts, and full-time classified and confidential staff in 5-year cohorts. Financial profiles of the college and the surrounding community are presented in part VI, while part VII features information on the college's physical plant. Finally, part VIII looks at economic and social trends that will affect educational planning. (EJV)

FOREWORD

This Fall, the College will embark upon the task of developing a strategic plan for the College programs and operation, which will include guidelines for the next five to ten years. The newly formed Strategic Planning Committee will coordinate the development of the plan with the Board of Trustees, who will eventually give the final approval.

Good planning is the basic foundation of almost every successful organization. This important phase of operation becomes even more critical when an organization has completed a long, rapid growth cycle and begins to grow at a slower rate, or is required to decrease the size of the organization. The management of decline is difficult and allows little room for error.

Mt. San Antonio College has experienced a very rapid growth from the beginning of the College in 1946 up to 1982. Since 1982, the College has had a decrease in enrollment and foresees very little growth and possibly some decline in enrollment in the near future. This forecast makes the planning process at Mt. San Antonio College more important than ever for continuing success and the production of quality programs. The Mt. San Antonio Community College Information Notebooks, Volume I and II contain some of the basic data which will be used for many planning decisions.

I would like to thank Barbara Hall, who has collected the data and coordinated this project, and Vera Drino, who assisted with the research and manuscript development. I would also like to thank the contributors of the data for their special efforts.

Dr. John D. Randall
Superintendent/President

EDUCATIONAL TRENDS

* Private industry spends $30 billion a year on formal classroom employee training and another $60 billion on alternatives to higher education. Fourteen corporate colleges grant doctorates. Over 200 joint-venture degree programs are jointly funded and administered by corporations and colleges.

* Significant increase in community college/business industrial training and technical assistance partnerships.

* Forty percent of adults want further education; 28 percent would choose vocational or technical schools; and 21 percent, two or four-year public colleges. Sixty-nine percent could not attend college without grants or low-interest loans.

* Increase of community college honors programs, 84 percent allow part-time students to enroll.

* Forty percent of all students are part time. One-in-twenty, part-time independent students, and one-in-five, full-time independent students, receive financial aid.

ECONOMIC TRENDS

* More economic and political activity shifting to Pacific Rim countries. More trade with Asian than European countries.

* Increased industrial internationalization and expansion of multi-national corporations.

* Highly interdependent world economy will generate international monetary reform.

* U.S. corporate restructuring for leaner workforce to increase competitive advantage.

* High paying production jobs in steel, auto, and other basic industries shrinking since 1980. By 1985, over 10 million manufacturing jobs lost to third world countries.

* Increasing number of two-income families.

* Women hold 60 percent of the service jobs.

Government 1985

* Significant privatization trend in government at all levels.

* Signs pointing to economic growth: lower interest rates, consumer confidence, greater money supply, lower inflation, Gram-Rudman-Hollings amendment to shrink $200 billion annual Federal deficit to zero by 1991.

* Signs pointing down: Third World debt $970 billion; U.S. share of global output dropped from almost 50 percent in 1950 to 20 percent in 1985; massive budget; trade deficits; sluggish capital spending; slow productivity growth; persistently high employment in the industrial sector; record low savings rate; recession in farming, oil, and mining; falling domestic auto sales, high consumer installment debt.

Oil

* Two 1986 predictions:

  1. By the year 2000, international oil business is transformed. Large multi-national oil companies will take control of world oil market from OPEC.

  2. A price of $15 a barrel will mean 300,000 jobs lost by 1991, and the U.S. oil imports will be 50 percent.

Southern California

* Gateway to the Pacific Rim.

* City of Los Angeles is a financial, legal and trading capital.

* Largest concentration in U.S. of high technology companies.

* Major businesses: manufacturing, electronics, plastics, computers, aircraft, apparel, fabricated metals and machinery primarily in Los Angeles Basin. Provides ten percent of the national output, one-fourth of the jobs in California, three-fourths in services, trade, education, government. Productivity increases two percent per annum.

Future Employment

* Impacting Technologies

  Communication/Information: Optical Disks, Broadband Communication, Computers, Electronic Media.

  Automation: Sensors and Programmable Controllers, Computer-Aided Design (CAD) and Engineering (CAE), Computer-Aided Manufacturing (CAM) and Testing (CAT), Industrial Robots and Computer Numerical Control Machines, Factory Automation-Computer Integrated Manufacturing, and Artificial Intelligence-Expert Systems.

New Materials: Metallic Glasses, High-Temperature Structural Ceramics, Solid Electrolytes.

Agriculture & Biological Engineering: Irradiation, Tissue/Culture Micropropagation, Recombinant DNA.

Energy: Heat Pumps, Photo Voltaics, Cogeneration, Energy Management & Control Systems.

Robotic Applications 1985-1990: Machining, Painting, Assembly for Batch Manufacturing, Underwater Geological Surveying, Reactor Furnace Maintenance, Filming (Movie Making), Cleaning, Underwater Welding, Coal Mining.

* Future Employment Areas

Antimatter Research for Powering Space Vehicles
Artificial Intelligence
Astro Law
Biomedical Electronics
Bionic Implant
CAD, Manufacturing, and Medical Research
Dialysis and Implant Technology
Energy Auditing, Conservation
Electronic Medical Diagnosis
Genetic Engineering
Geriatrics
Hazardous Waste Technology
High Technology Ceramics
Laser Technology
Radiation Therapy
Robotic Language Programming
Satellite Communications
Solar Technology
Space Medicine

Employment Trends

* Decline in unionized industrial jobs.

* Technological obsolescence affecting life employment patterns.

* Automation reducing human resource needs. By 1990 fewer smoke stack industries, more technology, fewer people in management, more "gold collar" professionals such as chemical engineers, scientists, computer programmers.

* Professional, technical "gold collar" skilled labor intensive jobs will increase; but greater growth will be in jobs requiring little or no education beyond high school.

* Seventy-five percent of corporate moves involve dual career couples.

293

POPULATION TRENDS

1985

* Baby Boomers born between 1946-1965 totalled 79 million; one-third of U.S. population. Ninty-one percent worked.

* Seventy-five percent of women with children were in the work force. Eighteen percent of the unemployed women were Black, 10 percent Hispanic, 6 percent White.

* Trend for more individuals and families with very low and very high incomes. More than 46 percent, 29 million families, with earnings exceeding $25,000. Thirteen million women; 4.2 million non-white, living in poverty.

California 1985

	No. of Students
K-12	1,278,447
Seniors	243,398
June 1985 Graduates	224,525
Community Colleges	1.1 Million
CSU	324,626
UC	147,957

* 1985 - Medium age, 31.21; over 64 years, 2,816,792.
2020 - Projected medium age, 38.08; 36.64, male; 39.50, female; over 64 years, 6,175,610.

* California leads the nation in number of foreign born: 15-18 percent.

MSAC District, 1985

* Fewer children and teenagers. Large professional population, white collar working couples and singles. Two zip code areas with unemployment rates of 9.5 to 17.4 percent for persons 16 years and older. Riverside/San Bernardino Counties are the fastest growing counties in U.S. The projected District population by the year 2000 is 715,440. The area east of College District including Rancho Cucamunga, Ontario, Fontana, Upland, Chino, Montclair, is 607,900.

* Educational level of MSAC District: largest one-third, 12.8 to 15.5 years or more; second one-third, 12 to 12.7 years; last third, 9.9 years or less to 11.9 (24 percent of this group have 10 to 11.4 years of education.)
